- Water self-feeding kit (One or two 25-litre tanks).
- Water filters: water softener or flavour filter.

The only machine that extract all the coffee essence.

The Coffeemar bean-to-cup brewer is the first and the only one in the market to incorporate a pressured valve, ensuring the whole coffee brewing cycle is done with the perfect water pressure, even at the start, getting out from the first to the last water drop all the essence and flavor of the coffee.

As well as this advance, Jofemar has introduced other innovations such an automatic regulation on the coffee grinding; by constantly measuring the pressure, the machine mechanically adjusts the grinder overture for a perfect thickness into the coffee brewer.

With the model G250 Jofemar covers its expectancy on always offering the best coffee quality even for small locations, a machine which its dimensions and outer design makes it perfect for any surrounding.
